AESCALAP – INSTRUMENT MANUFACTURER

A | INSTRUMENT AND TRAY CONCEPT – EXPERIENCED SINCE MORE THAN 150 YEARS

SOLUTIONS BEYOND FUSION

We provide added value as your spine partner with more than 150 years of experience in the medical devices industry.

FOR HIGHEST QUALITY STANDARDS

The Origin of Aesculap lies in the development and manufacturing of surgical instruments for medical applications. We apply 150 years of experience and knowledge to design and develop new instruments and process solutions for todays requirements.

This will allow you to reap significant benefits in your daily practice.

A special challenge of today is represented by the impact of the surgical instrumentation in the balance between economics, treatment quality, outcome and modern operating techniques and processes. Aesculap has undertaken the task of optimization of the entire instrument cycle and directed its focus on the economic and functional aspects of the entire process.

INSTRUMENT
MANUFACTURER

SOLUTIONS BEYOND FUSION

Single instrument tracking – we provide added value as your spine partner supporting you with a single instrument tracking on a global GS1 standard.

FOR MORE PATIENT SAFETY

Serialized instruments may be tracked with the Data Matrix and possibly be sent in time for repair – a real contribution for patient safety!

Products from station, single instruments for the sterile storage of the operation rooms or instruments reprocessed for third parties may be assigned easily to the right cost center – process optimization that pays!

Depending on the individual instrument cycle in the hospital a single tracking may help to decrease loss of instruments, improve correct assignment to cost center or improve the reprocessing by counting the reprocessing cycles.

PROCESS OPTIMIZATION THAT PAYS

According to the requirements of the US FDA with its UDI requirements (Unique Device Identification) Aesculap is coding all products with a Data Matrix code according to the GS1 standards where technically possible. The necessary content of the GTIN is completed with a serial number to offer the hospital an additional single instrument or implant tracking.

GS1 CONFORMITY /
TRACEABILITY

THE RIGHT STERILE GOODS AT THE RIGHT TIME IN THE RIGHT QUALITY FOR THE RIGHT PATIENT!

- Standardized coding ex works
- GTIN as global standard coded in Data Matrix
- Documented quality control of Data Matrix coding
- Compliance to standards and guidelines
- Post-coding of existing stocks through mobile Data Matrix service
- Post-coding according to your need at Aesculap or on site

BENEFIT:

- Facilitating patient safety
- Improvement of instrument and implant management
- Full traceability
- Full compliance to global standards
- Rapid identification of a device in the healthcare supply chain
- Easy documentation in electronic health records

PARTNERSHIP FOR MORE EFFICIENCY

GS1 is a worldwide, private enterprise company that is registered with the ISO registration center. The conception and implementation of global standards contribute to improve the value added chain. The head office is in Brussels, Belgium with local member organizations in more than 110 countries.

GS1 has the following targets:

- Global unique and clear numeration systems (for products, headquarters, services etc.)
- Technical solutions for machine readable codes (barcode, RFD etc.)
- Methods for data transfer with business partners (electronic messaging, master date etc.)

B. Braun as member of the GS1 may use such GS1 standards and track our products by GTINs. A GTIN is a Global Trade Item Number that is administrated and placed by GS1 to clearly identify the products and packages on a global basis. The GTIN is a passive numeric code with 13 or 14 digits.

SOLUTIONS BEYOND FUSION

We provide added value as your spine partner offering one spinal fusion platform for the entire scope of spine surgery through smart modularity and flexibility.

SPINAL FUSION PLATFORM

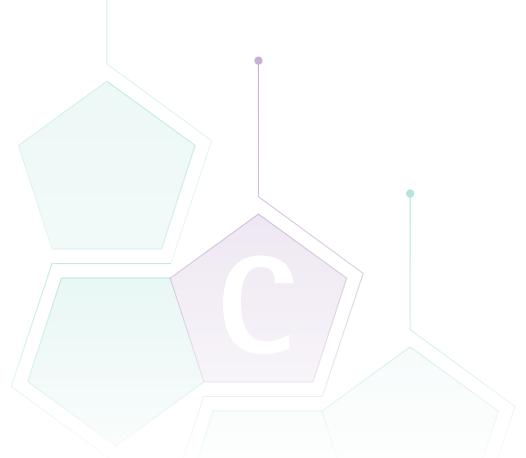

The instrumentation is important in the interplay between economics, treatment quality and modern operating technique. With the Ennovate® spinal fusion platform Aesculap made high efforts to optimize the instrumentation with regard to its importance in the instrument circle and directed its focus also to economic aspects, apart from functional aspects.

The Ennovate® system is a versatile and modular all-in-one system suitable for complex spinal deformity as well as degenerative pathology.

A comprehensive range of solutions provides hospitals with a single source to address needs in spinal surgery.

BENEFIT:

- Quality and safety in instrumentation
- Facilitated handling
- Improved hospital workflow thanks to all-in-one system
- Adaption of instrumentation according to your needs
- Improved functional aspects for more safety
- Comprehensive range of solutions for your needs
- Improved reprocessing process and safety thanks to dismantable instruments

INTUITIVE AND QUICK

Functional parts of the instrumentation have golden color coding for quick and intuitive handling of the instrumentation.

COLOR CODING

Color according to its different function for easy identification and improved safety.

FACILITATED REPROCESSING

Easy dismantable instruments for improved safety and facilitated reprocessing greatly improve efficiency in the hospital workflow.

SOLUTIONS BEYOND FUSION

We provide added value as your spine partner offering clearly separated tray modules as well as sterile containers and documentation solutions to facilitate your hospital workflow.

INSTRUMENT MODULES

Ennovate® offers a spinal fusion platform with smart modularity and flexibility. The instrument sets are reduced to the minimum to offer clearly arranged instrumentation for standard operation and extension modules according to your need. Its instrument platform reduces volumes in the entire instrument cycle.

| MODULES | ● Ennovate® OPEN | ● Ennovate® MIS |
|--|---|---|
| Standard Operation Preparation, Implantation, Locking | Implantation (1 / 2) | Implantation (1 / 2) |
| Extension Special needs | Manipulation/Optional (1 / 2) Connector Application (1 / 1) Auxiliary S4® Instruments (1 / 1) | Manipulation (1 / 2) Extension (1 / 2) Optional (1 / 1) |
| Extension Trauma | Open / MIS FRI (1 / 2) Open FRI (1 / 1) | Open / MIS FRI (1 / 2) |

DEDICATED SOLUTIONS FOR INDIVIDUAL REQUIREMENTS

As a leading supplier of comprehensive sterile supply management systems worldwide, Aesculap can offer an extensive, clinically proven product portfolio for sterile packaging. The diversity of the Aesculap Sterile Container System offers packaging solutions for every instrument tray used in hospital practice. Containers in various variants and sizes and the comprehensive range of accessories make the Aesculap Sterile Container System a universal solution for the sterile supply of surgical instruments.

TRANSPARENCY AND DOCUMENTATION

Sterile materials packaging is one element in the complex supply and disposal process serving surgical departments. The integration of the instacount® instrument management system developed by Aesculap allows efficiency and transparency throughout the sterile supplies cycle. For this, instacount® BASIC offers the ideal entry-level solution for computer-aided documentation. instacount® BASIC can be upgraded to the network solution, instacount® PLUS, at any time.

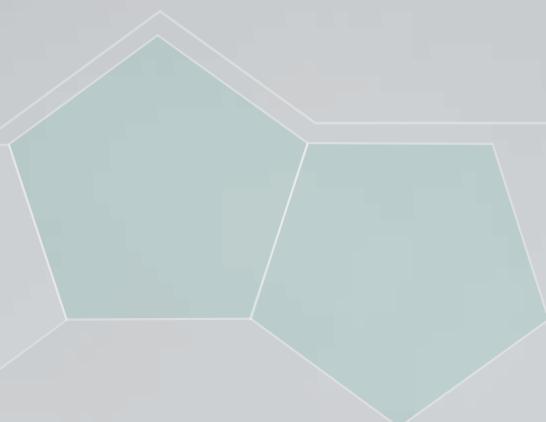

BENEFIT:

- Configuration of trays in slim modules to improve the hospital workflow
- Space saving arrangement of trays in the operation room
- Reduced number of opened instrument trays for time-saving in re-packing and reprocessing
- Complete range of sterile technology to cover your needs and increase safety
- Additional documentation system available to facilitate the hospital workflow

SOLUTIONS BEYOND FUSION

We provide added value as your spine partner offering instrument trays with washing and sterilization validation to improve your hospital workflow.

Ergonomic closure elements facilitate carrying and prevent an unwanted opening.

WASHING AND STERILIZATION VALIDATION

The AESCULAP® OrthoTray® is designed to improve the work efficiency in the entire instrument cycle. The Ennovate® instrument trays have washing and sterilization validation according to DIN58952-3. This is possible thanks to the large perforation of the trays for good water flow as well as cleaning-friendly instruments. Instruments that have to be washed separately due to disassembling or design are marked in the tray bottom.

The washing and sterilization validation, the color coded edges according to module, the instrument icons and markings aim for an improvement of the hospital workflow by reduction of work steps and time for re-packaging of the instruments after the washing process.

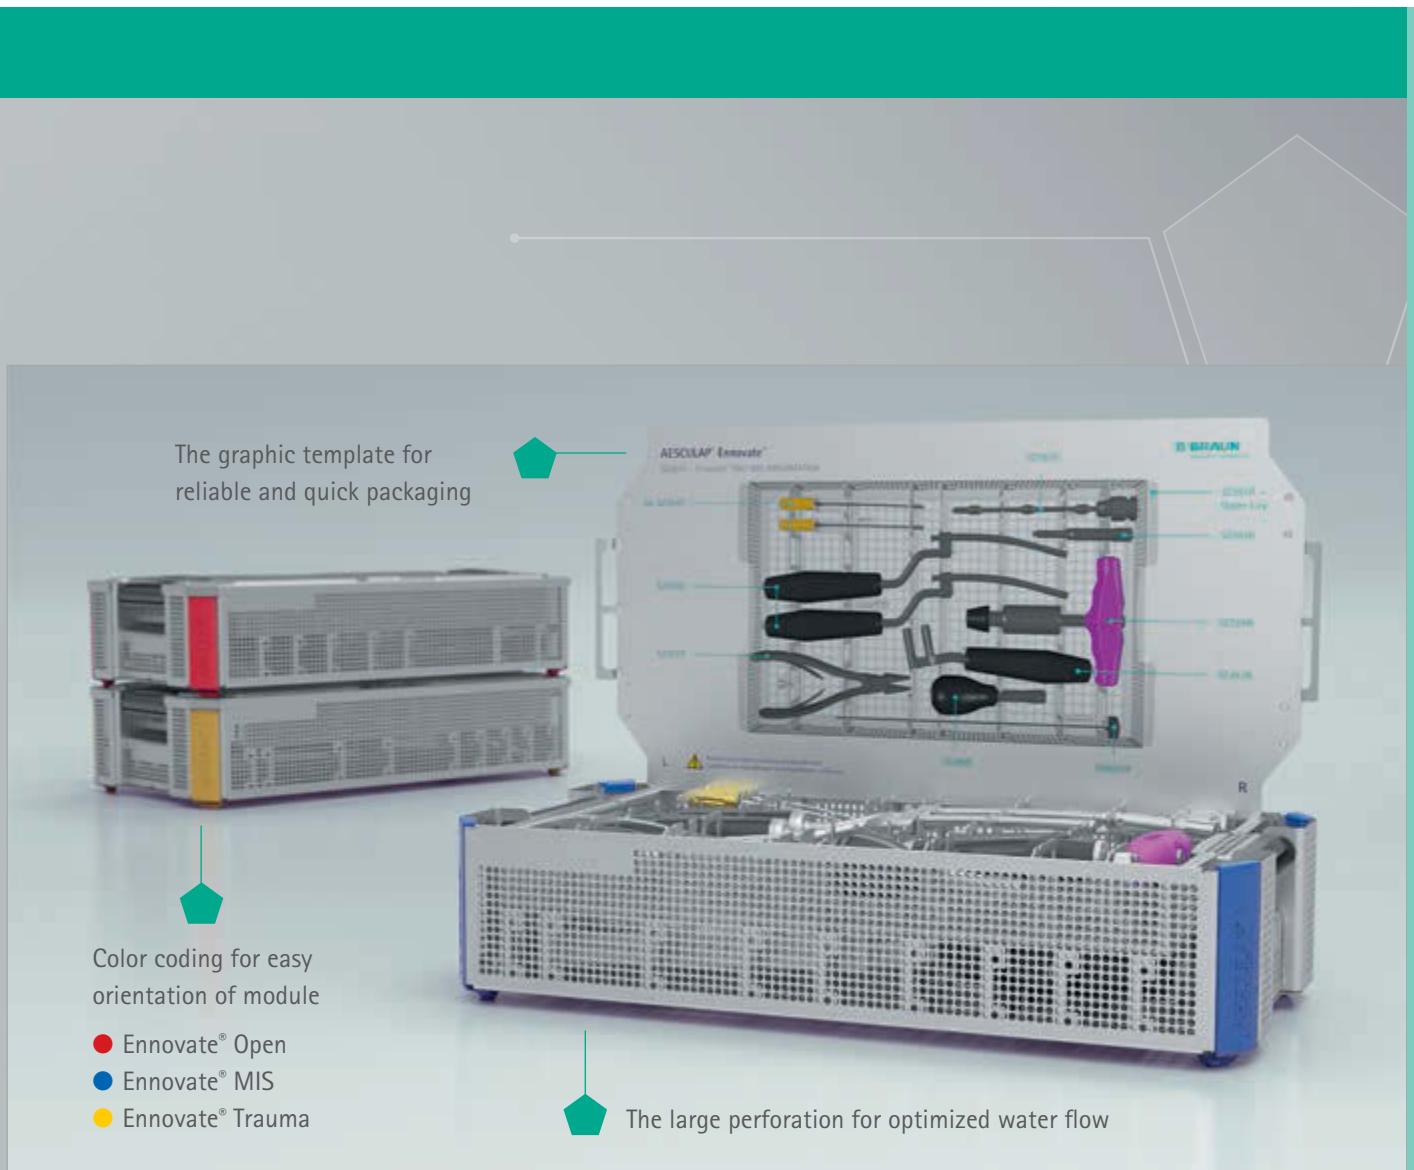

Packaged in the Aesculap sterile container, AESCULAP® OrthoTray® basket trays can be stored maintaining sterility.

Improved customization – placeholder for different options of handles according to the surgeon's need without additional storage space.

Possible combinations:

- 2 x T-handles with 2 short straight handles
- 2 x T-handles with 2 ball drop handles
- 2 x long straight handles

Instrument icons/
item number/hint for
instrument handling
(wash separately,
dismantling*) for easy
re-packing and decrease
of missing items

BENEFIT:

- Washing and sterilization tray for more work efficiency in the entire instrument cycle
- Large perforation of trays for optimized water flow
- Reduced time of re-packing
- Lower risk of incomplete instrument trays
- Color coding for easy orientation
- Instrument icons for easy orientation and re-packing
- Graphic stencil for quick packaging

* Please see IFU for manual precleaning
